	<i>Taxiphyllum</i> sp. 'Spiky'	Spiky Moss portion (loose)	portion	out
	<i>Vesicularia ferriei</i> 'Weeping'	Weeping Moss portion (loose)	portion	out

Aquarium Plants, Tissue Culture

-- Offered here with minimal markup, mainly as a convenience to shops with limited access.

-- Other varieties can be added as special orders when we do our orders.

BACK!	<i>Alternanthera reineckii</i>	'Mini' cutlivar	culture cup	1
BACK!	<i>Alternanthera reineckii</i>	'Rosaefolia' cultivar	culture cup	1
BACK!	<i>Alternanthera reineckii</i>	'Rosanerevig' cultivar	culture cup	1
	<i>Hemianthus callitricoides</i>	'Cuba' / Dwarf Baby Tears	culture cup	1
	<i>Hemianthus micranthemoides</i>	Pearl Weed, Baby Tears, also <i>Micranthemum micranthemoides</i> .	culture cup	1

Aquarium Plants, Tissue Culture, continued...

<i>Hydrocotyle sibthripoides</i>	Lawn Marsh Pennyworth	culture cup	1
<i>Juncus repens</i>		culture cup	1
<i>Micranthemum 'Monte Carlo'</i>		culture cup	sold out
<i>Staurogyne repens</i>		culture cup	1
<i>Plagiomnium cf. affine</i>	Pearl Moss	culture cup	1
<i>Utricularia graminifolia</i>		culture cup	sold out

CAPTIVE BRED SALTWATER / MARINE FISH

Blennies

Species	Additional Info	Approx. Size	Available
Molly Miller Blenny	<i>Scartella cristata</i> , captive bred right here in Minnesota! *may* eat <i>Aiptasia</i> .	2"+	many

Clownfishes, Wild and Captive Bred Wild Type

Species	Additional Info	Approx. Size	Available
Bicinctus	Amphiprion bicinctus, may carry "Spotcinctus" gene	3"	1
Clarkii, Black	Amphiprion clarkii, single fish available, not the Australian form.	2.5"	1
Clarkii	Amphiprion clarkii, standard type	4"	2
Tomato	Amphiprion frenatus, standard type	3"	2

AMPHIBIANS & REPTILES

Poison Dart Frogs

Species	Additional Info	Approx. Size	Available
<i>Dendrobates leucomelas</i>	Finespot variety	froglet	more Sept.?

VIVARIUM SUPPLIES & PLANTS

Vivarium Plants are generally able to be safely shipped when overnight lows along the route are 40F or above. Shipments outside this range may be arranged including the use of heat packs, although survival guarantees may be void and will be discussed prior to shipment. We do not ship vivarium plants to Arizona or Hawaii.

Bromeliads

**NOTES* - Bromeliads require intense light to develop and maintain the bold red, pink and orange colorations certain varieties are known for. Depending on their growing conditions, their color will vary dramatically.*

Bromeliad offsets, aka. "pups" are the young plants removed from a mother plant. They will last longer, but will start out smaller, and can be shipped with 2" cups if desired. Mature-sized bromeliads are larger and generally will generally be shipped loose, no pot/cup.

Field grown bromeliads should be sanitized prior to use. See the MiniWaters VIVARIUM PLANT SANITIZATION Protocol below for further details. **Sanitized Bromeliads** have been cleaned and bleach sanitized at least once.

Neoregelia Bromeliads - Sanitized

	Variety	Additional Info	Approx. Size	Available
SALE!	<i>pauciflora</i> 'Scurfy Clone'	amazing stoloniferous species.	lg. offset	many
SALE!	<i>pauciflora</i> 'Scurfy Clone'	amazing stoloniferous species.	multi-growth	several
	<i>(punctatissima rubra X tigrina)</i>	Very vertical, heavily red banded. Can get Deep Red.	lg. offset	out

Neoregelia Bromeliads - Field Grown

	Variety	Additional Info	Approx. Size	Available
	<i>ampullacea</i> 'Black Beauty'	Really dark cultivar of the species. Limited!	offset	5
	Assorted, Named	Dozens of varieties. Will come named.	offset	many!
	Fireball, red	Currently green-maroon, will turn full red with high light.	offset	few
	<i>marmorata</i> "Banded"	A medium sized Neo. Really choice! Limited and going fast!	offset	2
	Mo Peppa Please	Incredibly Heavily Spotted, hence the name.	offset	few
	Red Bird X <i>pauciflora</i>	Heavily spotted with wine-red to purple markings. 6"	offset	1
	Zoe	White variegation turns pink under strong light	offset	few

Other Bromeliads - Field Grown

	Variety	Additional Info	Approx. Size	Available
	Assorted, Named	Asst. <i>Billbegia</i> , <i>Guzmania</i> , <i>Vriesea</i> , etc.. Will come named	offset	few
	<i>Vriesea Splenreit</i>	"Flaming Sword" Bromeliad. Can get very large.	offset	1

Check Out the Duluth-grown line of vivarium plants by MiniWaters!

Duluth-grown plants are grown from seed or cuttings either from stock plants or vivarium trimmings, and are not in contact with animals for months. These cuttings are sanitized with a bleach treatment prior to propagation, and are grown indoors under LED lighting to market size. We *do* use rooting hormone. We fertilize using organic fish emulsion fertilizer, which has not had any deleterious effects with our frogs. We grow in a mix of ProMix + additional perlite, and recommend removing all substrate from your plants prior to final planting in a vivarium.

Aquarium Plants, Emerged - Duluth Grown

Most often thought of as aquarium plants, but they happen to flourish high humidity terrestrial culture, just like all our other vivarium plants!

Species	Additional Info	Approx. Size	Available
<i>Hydrocotyle tripartita</i>	a.k.a. Dwarf Pennywort Japan - adorable groundcover type plant	2" cup	more soon
<i>Micranthemum</i> 'Monte Carlo'	grown terrestrially, forming carpet. 2" cup, roughly 3 sq. inch.	2" cup	4

BACK!	<i>Riccia fluitans</i>	"Crystalwort" - covers the surface of the 2" cup, roughly 3 sq. inch	2" cup	few
--------------	------------------------	--	--------	-----

Begonia species - Duluth-grown

	<i>Tradescantia zebrina</i>	"Wandering Jew Purple" - vines and climbs.	2" cup, LG.	ask

While we strive to produce a top quality vivarium plant, we do *not* promote our plants as 100% "pest, disease and pathogen free" .

When using our plants in-house, we remove plants from potting media, inspect, and rinse before planting. However, once our plants leave here, they can come in contact with other pests and animals. So we encourage all plants to be re-sanitized by the end user. Here's how to do it:

MiniWaters VIVARIUM PLANT SANITIZATION Protocol

1. Unpot plant and discard substrate. Rinse all substrate off roots. Visually inspect for any pests.
2. Submerge and soak plants in room temp. water for 15 minutes to fully hydrate
3. Prepare a solution at a rate of 1 cup water to 1 tablespoon generic, unscented, household bleach.
4. Submerge and soak plants in bleach sanitization solution for 15 minutes.
5. After bleach bath, drain plants and rinse thoroughly
6. Prepare a final bath of room temp. water, add aquarium dechlorination (eg. Chloram-X) and soak plants again
7. Check plants, allow to mostly dry, smell for any bleach. If any hint of bleach is noted, repeat #6 until resolved.
8. We normally hold plants for at least 24 hours longer before planting them in a vivarium as an added safety measure.

To order, email matt@minwaters.com or call 218-206-1225 - this list supercedes any prior lists.

Shipping Available via Speedee Delivery, with overnight service to MN, WI, Northern IL, and Northern IA and other areas covered.

Shipping at actual cost for Heat Packs & Speedee Fees (rates are VERY affordable, eg. 17 lb. to middle WI for \$11)

Most Speedee shipments will be less than \$15.00 per box! Live arrival is guaranteed - same-day photos in bags for DOA claims please.

Shipping to other areas via FedEx or UPS - a customized quote will be furnished with your pending order.

We have had a 99.99% live arrival rate for the last 6 years now (2018 was technically 100%) so on the one hand, you should feel

really comfortable when ordering from MiniWaters. On the other hand, we'll be pretty skeptical of any DOAs without proof!

So be sure to report and document any losses right away and we'll immediately get you taken care of!
